

CHEMICO-BIOLOGICAL INTERACTIONS

SUBJECT INDEX

VOLUME 74 (1990)

- Acridinic thioether, DNA intercalation, cytotoxicity, 291
- 7-Alkylguanines, postlabelling, DNA-adducts, T_4 polynucleotide kinase, cisplatin, cross-link, 45
- Aminoacylation, threonyl-tRNA synthetase, spermine, stimulation, 33
- Anthracycline, DNA interactions, differential scanning calorimetry, 315
- Antioxidants, microsomes, lipid peroxidation, prooxidants, iron, peroxides, copper, vitamin E, protein sulfhydryls, 233
- Arachidonic acid, carbon tetrachloride, hepatocytes, phospholipidase A_2 , cell death, bioactivation, 195
- Aromatic amines, hyperketonaemia, diabetes, metabolic activation, nitrosamines, food mutagens, 281
- Autoradiography, 2,3,7,8-tetrachlorodibenzo-p-dioxin, thymus, immunotoxicity, mouse, differentiation antigen, 179
- Avian erythrocytes, *N*-methyl-*N*-nitrosourea, reactivation, nucleolus, 207
- Benzene, toluene, phenol, hydroquinone, catechol, erythrocytes, hematopoiesis, female mice, 55
- Benzo[a]pyrene, fish hepatocytes, brown bullhead, 7,8-dihydroxy-7,8-dihydrobenzo[a]pyrene, glucuronides, glutathione conjugates, 119
- Benzo[a]pyrene, green alga, conjugation, 93
- Binding site, cytochrome P-450, hydrophobicity, QSAR, 63
- Bioactivation, carbon tetrachloride, arachidonic acid, hepatocytes, phospholipidase A_2 , cell death, 195
- Biooxidation, bioreduction, free radicals, mitoxantrone, electron spin resonance, electrochemistry, 139
- Bioreduction, biooxidation, free radicals, mitoxantrone, electron spin resonance, electrochemistry, 139
- Bioreduction, platinum antitumor compounds, DNA damage, DNA strand breaks, *Escherichia coli*, 343
- Brown bullhead, fish hepatocytes, benzo[a]pyrene, 7,8-dihydroxy-7,8-dihydrobenzo[a]pyrene, glucuronides, glutathione conjugates, 119
- Cadmium, dithiocarbamates, talocetamine (*N*-substituted), hepatic deposits, renal deposits, 79
- Carbon tetrachloride, arachidonic acid, hepatocytes, phospholipidase A_2 , cell death, bioactivation, 195
- Catechol, benzene, toluene, phenol, hydroquinone, erythrocytes, hematopoiesis, female mice, 55
- Cell death, carbon tetrachloride, arachidonic acid, hepatocytes, phospholipidase A_2 , bioactivation, 195
- Cisplatin, postlabelling, 7-alkylguanines, DNA-adducts, T_4 polynucleotide kinase, cross-link, 45
- Conjugation, benzo[a]pyrene, green alga, 93
- Copper, microsomes, lipid peroxidation, prooxidants, iron, peroxides, antioxidants, vitamin E, protein sulphhydryls, 233
- Cross-link, postlabelling, 7-alkylguanines, DNA-adducts, T_4 polynucleotide kinase, cisplatin, 45
- Cytochrome P-450, binding site, hydrophobicity, QSAR, 63
- Cytochrome P-450, hepatocyte culture, drug metabolism, xenobiotic toxicity, P-450 induction, 1
- Cytotoxicity, acridinic thioether, DNA intercalation, 291
- Degradation, *cis*-diamminedichloroplatinum(II), deoxyguanosine adducts, depurination, 253
- Deoxyguanosine adducts, *cis*-diamminedichloroplatinum(II), depurination, degradation, 253

- Depurination, *cis*-diamminedichloroplatinum(II), deoxyguanosine adducts, degradation, 253
- Diabetes, hyperketonaemia, metabolic activation, nitrosamines, food mutagens, aromatic amines, 281
- cis*-Diamminedichloroplatinum(II), deoxyguanosine adducts, depurination, degradation 253
- Differential scanning calorimetry, anthracycline, DNA interactions, 315
- Differentiation antigen, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, thymus, immunotoxicity, mouse, autoradiography, 179
- 7,8-Dihydroxy-7,8-dihydrobenzo[*a*]pyrene, fish hepatocytes, brown bullhead, benzo[*a*]pyrene, glucuronides, glutathione conjugates, 119
- Dithiocarbamates, taloocetamine (*N*-substituted), cadmium, hepatic deposits, renal deposits, 79
- DNA-adducts, postlabelling, 7-alkylguanines, T_4 -polynucleotide kinase, cisplatin, cross-link, 45
- DNA damage, *cis*-thymidine glycol, X-ray irradiation, fluorescence postlabeling, HPLC, 107
- DNA damage, platinum antitumor compounds, bioreduction, DNA strand breaks, *Escherichia coli*, 343
- DNA interactions, anthracycline, differential scanning calorimetry, 315
- DNA intercalation, acridinic thioether, cytotoxicity, 291
- DNA strand breaks, hydroxyl radicals, semiquinone radicals, quinones, tetrachlorohydroquinone, 305
- DNA strand breaks, platinum antitumor compounds, bioreduction, DNA damage, *Escherichia coli*, 343
- Drug metabolism, cytochrome P-450, hepatocyte culture, xenobiotic toxicity, P-450 induction, 1
- Electrochemistry, bioreduction, biooxidation, free radicals, mitoxantrone, electron spin resonance, 139
- Electron spin resonance, bioreduction, biooxidation, free radicals, mitoxantrone, electrochemistry, 139
- Erythrocytes, benzene, toluene, phenol, hydroquinone, catechol, hematopoiesis, female mice, 55
- Escherichia coli*, platinum antitumor compounds, bioreduction, DNA damage, DNA strand breaks, 343
- Female mice, benzene, toluene, phenol, hydroquinone, catechol, erythrocytes, hematopoiesis, 55
- Fish hepatocytes, brown bullhead, benzo[*a*]pyrene, 7,8-dihydroxy-7,8-dihydrobenzo[*a*]pyrene, glucuronides, glutathione conjugates, 119
- Fluorescence postlabeling, *cis*-thymidine glycol, X-ray irradiation, DNA damage, HPLC, 107
- Food mutagens, hyperketonaemia, diabetes, metabolic activation, nitrosamines, aromatic amines, 281
- Free radicals, bioreduction, biooxidation, mitoxantrone, electron spin resonance, electrochemistry, 139
- Furanocoumarins, rotenone, mitochondrial bioenergetics, 263
- Glucuronides, fish hepatocytes, brown bullhead, benzo[*a*]pyrene, 7,8-dihydroxy-7,8-dihydrobenzo[*a*]pyrene, glutathione conjugates, 119
- Glutathione conjugates, fish hepatocytes, brown bullhead, benzo[*a*]pyrene, 7,8-dihydroxy-7,8-dihydrobenzo[*a*]pyrene, glucuronides, 119
- Green alga, benzo[*a*]pyrene, conjugation, 93
- Hematopoiesis, benzene, toluene, phenol, hydroquinone, catechol, erythrocytes, female mice, 55
- Hepatic deposits, dithiocarbamates, taloocetamine (*N*-substituted), cadmium, renal deposits, 79
- Hepatocytes, carbon tetrachloride, arachidonic acid, phospholipase A₂, cell death, bioactivation, 195
- Hepatocyte culture, cytochrome P-450, drug metabolism, xenobiotic toxicity, P-450 induction, 1
- HPLC, *cis*-thymidine glycol, X-ray irradiation, fluorescence postlabeling, DNA damage, 107
- Hydrophobicity, cytochrome P-450, binding site, QSAR, 63
- Hydroquinone, benzene, toluene, phenol, catechol, erythrocytes, hematopoiesis, female mice, 55

- 3-Hydroxychrysene, metabolism, microsomes, triols, pentol, 163
- Hydroxyl radicals, DNA strand breaks, semiquinone radicals, quinones, tetrachlorohydroquinone, 305
- Hyperketonaemia, diabetes, metabolic activation, nitrosamines, food mutagens, aromatic amines, 281
- Immunotoxicity, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, thymus, mouse, differentiation antigen, autoradiography, 179
- Inhibition, microsomal glutathione transferase, 275
- Iron, microsomes, lipid peroxidation, prooxidants, peroxides, copper, antioxidants, vitamin E, protein sulfhydryls, 233
- L5178Y lymphoma, polyamines, thiosemicarbazone of 1,3-dichloroacetone, metastasis, sialylation, 221
- Lipid peroxidation, microsomes, prooxidants, iron, peroxides, copper, antioxidants, vitamin E, protein sulfhydryls, 233
- Lipid peroxidation, nitroxide radicals, spin-traps, 325
- Metabolic activation, hyperketonaemia, diabetes, nitrosamines, food mutagens, aromatic amines, 281
- Metabolism, 3-hydroxychrysene, microsomes, triols, pentol, 163
- Metastasis, polyamines, thiosemicarbazone of 1,3-dichloroacetone, L5178Y lymphoma, sialylation, 221
- Microsomal glutathione transferase, inhibition, 275
- Microsomes, 3-hydroxychrysene, metabolism, triols, pentol, 163
- Microsomes, lipid peroxidation, prooxidants, iron, peroxides, copper, antioxidants, vitamin E, protein sulfhydryls, 233
- Mitochondrial bioenergetics, furanocoumarins, rotenone, 263
- Mitoxantrone, bioreduction, biooxidation, free radicals, electron spin resonance, electrochemistry, 139
- Mouse, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, thymus, immunotoxicity, differentiation antigen, autoradiography, 179
- N*-Methyl-*N*-nitrosourea, avian erythrocytes, reactivation, nucleolus, 207
- Nitrosamines, hyperketonaemia, diabetes, metabolic activation, food mutagens, aromatic amines, 281
- Nitroxide radicals, lipid peroxidation, spin-traps, 325
- Nucleolus, avian erythrocytes, *N*-methyl-*N*-nitrosourea, reactivation, 207
- P*-450 induction, cytochrome *P*-450, hepatocyte culture, drug metabolism, xenobiotic toxicity, 1
- Pentol, 3-hydroxychrysene, metabolism, microsomes, triols, 163
- Peroxides, microsomes, lipid peroxidation, prooxidants, iron, copper, antioxidants, vitamin E, protein sulfhydryls, 233
- Phenol, benzene, toluene, hydroquinone, catechol, erythrocytes, hematopoiesis, female mice, 55
- Phospholipidase A_2 , carbon tetrachloride, arachidonic acid, hepatocytes, cell death, bioactivation, 195
- Platinum antitumor compounds, bioreduction, DNA damage, DNA strand breaks, *Escherichia coli*, 343
- Polyamines, thiosemicarbazone of 1,3-dichloroacetone, metastasis, L5178Y lymphoma, sialylation, 221
- Postlabelling, 7-alkylguanines, DNA-adducts, T, polynucleotide kinase, cisplatin, cross-link, 45
- Prooxidants, microsomes, lipid peroxidation, iron, peroxides, copper, antioxidants, vitamin E, protein sulfhydryls, 233
- Protein sulfhydryls, microsomes, lipid peroxidation, prooxidants, iron, peroxides, copper, antioxidants, vitamin E, 233
- QSAR, cytochrome *P*-450, binding site, hydrophobicity, 63
- Quinones, DNA strand breaks, hydroxyl radicals, semiquinone radicals, tetrachlorohydroquinone, 305
- Reactivation, avian erythrocytes, *N*-methyl-*N*-nitrosourea, nucleolus, 207
- Renal deposits, dithiocarbamates, talo-octamine (*N*-substituted), cadmium, hepatic deposits, 79
- Rotenone, furanocoumarins, mitochondrial bioenergetics, 263
- Semiquinone radicals, DNA strand breaks, hydroxyl radicals, quinones, tetrachlorohydroquinone, 305

- Sialylation, polyamines, thiosemicarbazone of 1,3-dichloroacetone, metastasis, L5178Y lymphoma, 221
- Spermine, threonyl-tRNA synthetase, aminoacylation, stimulation, 33
- Spin-traps, lipid peroxidation, nitroxide radicals, 325
- Stimulation, threonyl-tRNA synthetase, aminoacylation, spermine, 33
- T, polynucleotide kinase, postlabelling, 7-alkylguanines, DNA-adducts, cisplatin, cross-link, 45
- Talocetamine (*N*-substituted), dithiocarbamates, cadmium, hepatic deposits, renal deposits, 79
- 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin, thymus, immunotoxicity, mouse, differentiation antigen, autoradiography, 179
- Tetrachlorohydroquinone, DNA strand breaks, hydroxyl radicals, semiquinone radicals, quinones, 305
- Thiosemicarbazone of 1,3-dichloroacetone, polyamines, metastasis, L5178Y lymphoma, sialylation, 221
- Threonyl-tRNA synthetase, aminoacylation, spermine, stimulation, 33
- cis*-Thymidine glycol, X-ray irradiation, fluorescence postlabeling, DNA damage, HPLC, 107
- Thymus, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, immunotoxicity, mouse, differentiation antigen, autoradiography, 179
- Toluene, benzene, phenol, hydroquinone, catechol, erythrocytes, hematopoiesis, female mice, 55
- Triols, 3-hydroxychrysene, metabolism, microsomes, pentol, 163
- Vitamin E, microsomes, lipid peroxidation, prooxidants, iron, peroxides, copper, antioxidants, protein sulfhydryls, 233
- X-ray irradiation, *cis*-thymidine glycol, fluorescence postlabeling, DNA damage, HPLC, 107
- Xenobiotic toxicity, cytochrome *P*-450, hepatocyte culture, drug metabolism, *P*-450 induction, 1
